CILogon User Growth

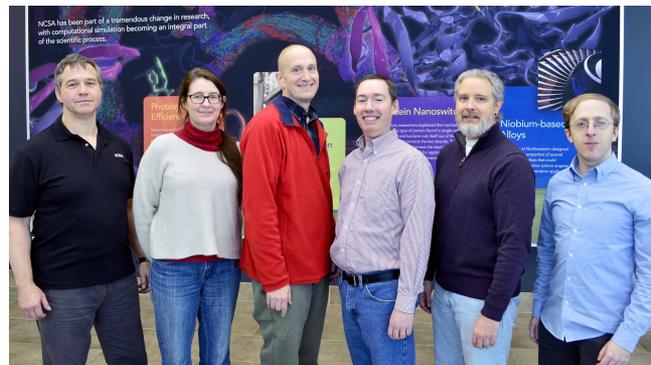

CILogon 2.0 Project

- ❑ 3 year NSF CICI award
 - ❑ January 2016 - December 2018
- ❑ Provide an integrated open source Identity and Access Management (IdAM) platform for cyberinfrastructure
 - ❑ CILogon: federated identity management
 - ❑ COmanage: collaborative organization management
- ❑ Support *international* collaborations

CILogon 2.0 Team Members

- ❑ Jim Basney
- ❑ Terry Fleury
- ❑ Jeff Gaynor
- ❑ Venkat Yekkirala
- ❑ Heather Flanagan
- ❑ Scott Koranda
- ❑ Benn Oshrin
- ❑ Arlen Johnson

Science Partners

- ❑ NANOGrav Physics Frontiers Center
- ❑ Laser Interferometer Gravitational-Wave Observatory (LIGO)
- ❑ Data Observation Network for Earth (DataONE)

Cyberinfrastructure Partners

XSEDE

Extreme Science and Engineering
Discovery Environment

- ❑ Operational support
- ❑ Integration platform
- ❑ International use cases
- ❑ Support for European identities
- ❑ Using eduGAIN

Project Deliverables

- ❑ CILogon-COmanage Integration
- ❑ VO collaboration management
- ❑ International Interfederation (eduGAIN)
- ❑ Linking ORCID identities
- ❑ Supporting Campus Cyberinfrastructure (LDAP and SSH Key Management)
- ❑ Multi-factor Authentication and Levels of Assurance
- ❑ Web Single Sign-On Gateway (IdPoLR, SAML AA, SAML-OIDC)

CILogon-COmanage Integration

- ❑ Combine identity bridging (CILogon) with collaboration management (COmanage)
- ❑ Support configurable enrollment flows, roles, groups, identifiers, and expiration
- ❑ Issuing assertions and certificates containing VO-specific attributes

International Interfederation

- ❑ Exploring two options:
 - ❑ International IdPs with US CILogon instance
 - ❑ EU CILogon instance linked with GÉANT's Trusted Certificate Service (TCS)
- ❑ Relying on eduGAIN and REFEDS R&S
- ❑ Pilot project with AARC underway

Supporting Campus CI

- ❑ LDAP interface for campus applications that support LDAP but not SAML or OIDC
 - ❑ Linked X.509, SAML, OIDC, and ORCID IDs
 - ❑ Application-specific passwords
 - ❑ VO-specific user profile and attribute info
- ❑ SSH key management
 - ❑ SSH public keys linked with federated IDs
 - ❑ LDAP lookup for campus compute clusters

MFA and LOA

- ❑ Use Multi-Factor Authentication (MFA) and signal its use in our assertions
 - ❑ OIDC Authentication Context Class Reference
 - ❑ X.509 certificate extension (policy OID)
- ❑ Pass along other Level of Assurance (LOA) information provided externally

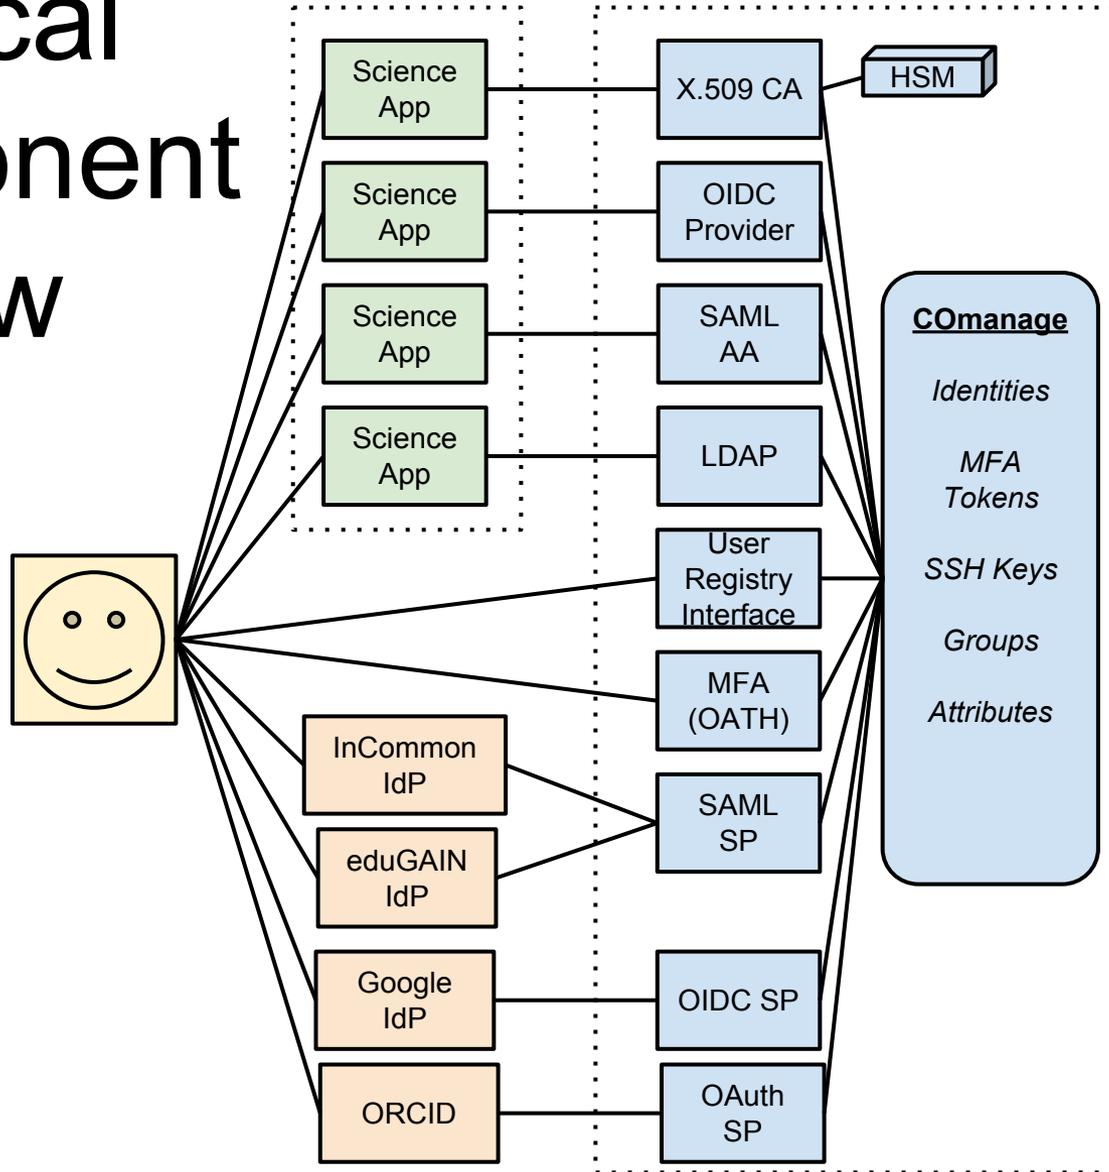

Web Single Sign-On Gateway

- ❑ IdP of Last Resort (IdPoLR)
 - ❑ Adopting InCommon-recommended IdPoLR provider(s)
 - ❑ Providing additional IdPoLR if needed
- ❑ SAML Attribute Authority (AA)
 - ❑ Providing VO-specific attributes and group membership info for authorization
 - ❑ Using Shibboleth SP capability to query multiple SAML AAs (campus and VO attrs)

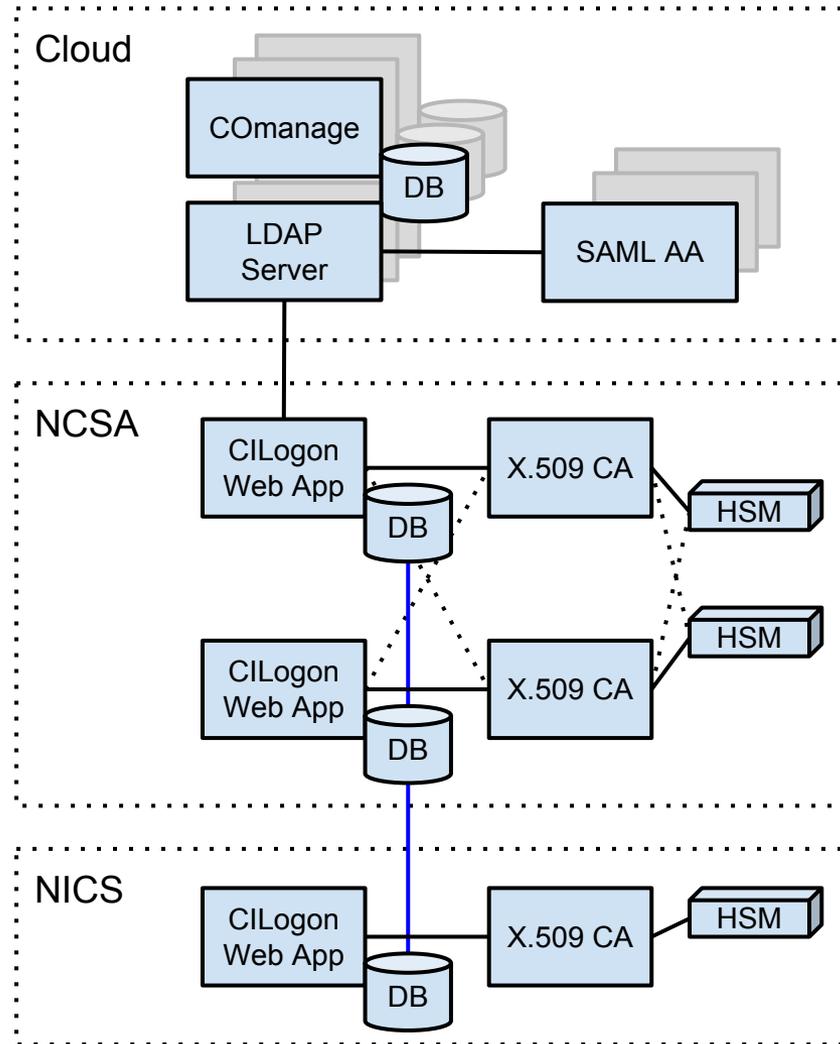

Web Single Sign-On Gateway

- ❑ SAML to OIDC Gateway
 - ❑ Making InCommon authentication available to apps that support OIDC but not SAML
 - ❑ Following on success of CILogon's SAML to OAuth 1.0 gateway
- ❑ Linking ORCID Researcher IDs
 - ❑ Using ORCID OAuth interface to link ORCID IDs with federated IDs
 - ❑ Including ORCID IDs in X.509, LDAP, SAML, and OIDC

Logical Component View

Deployment View

Next Steps

- ❑ Working with the science projects
 - ❑ More partners welcome!
- ❑ Standardizing our OIDC claims
- ❑ Interfederation
 - ❑ InCommon will be eduGAIN-ready in February!
- ❑ ORCID ID linking
 - ❑ 1st CILogon-COmanage integration driver

Thanks!
