

Min Song

Min Song is a Professor in the Electrical Engineering and Computer Science Department at the University of Toledo. Currently, he is serving the National Science Foundation as a Program Director in the Division of Computer and Network Systems. Dr. Song's research interests include design, analysis, and evaluation of cognitive radio networks, wireless sensor networks, wireless mesh networks, cyber physical systems, and wireless ad-hoc networks. His research interests also include network security and mobile computing. Dr. Song's professional career is comprised of a total 25 years in industry, academia, and government. Over the course of his career, Dr. Song has held various leadership positions and gained experience in performing a wide range of duties and responsibilities. Of most significance is his service with the NSF as a Program Director since October 2010. Over the years, he has published more than 130 technical papers. Dr. Song was the Founding Director of a Computer Networking System Division in an IT company, and launched two international journals and served as Editor-in-Chief. Dr. Song has acted as an Editor or Guest Editor of 14 international journals, and served as General Chair, Technical Program Committee Chair, and Session Chair for numerous international conferences. Dr. Song is the recipient of NSF CAREER Award. Dr. Song is an IEEE Senior member.
