

MAGIC Meeting Agenda
November 5, 2008, 2:00-3:30
NSF, Room 1150

Teleconference Number: 1 877 937 5634
Participant Code: 139891

Welcome

Susan Turnbull/Mike Nelson/Ken Klingenstein

Potentials and Realities of Distributed Scientific Communities:
Reflections from Recent LHC Milestones, Miron Livny, OSG, University of Wisconsin-
Madison

Grid Roundtable: Status, updates

- ESG
- CDEPS, CDIGS
- TeraGrid
- OSG
- Shibboleth
- Federal Agencies

MAGIC Resource: Video Explains Importance of ESnet and Internet2
Cyberinfrastructure for LHC

Internet2 has produced a 12-minute video explaining the importance of advanced networking to support the Large Hadron Collider (LHC) experiments at CERN. The LHC will be the first experiment to fully utilize the advanced capabilities of ESnet, Internet2, and US LHCNet, which will connect DOE national laboratories and university researchers across the country to the LHC data. ESnet senior scientist and advisor Bill Johnston has a major speaking part in the video, which can be viewed at <http://www.internet2.edu/lhc/>.

NCO Issues: Bob Bohn

Agency Meetings of Interest

All

Future MAGIC Meetings

December 3, 2:00-4:00, NSF Room 1150
January 7, 2009, 2:00-4:00, NSF Room 1150
